

## Agasthya 2021 Series ORP Sensor Model BI1320-S-S

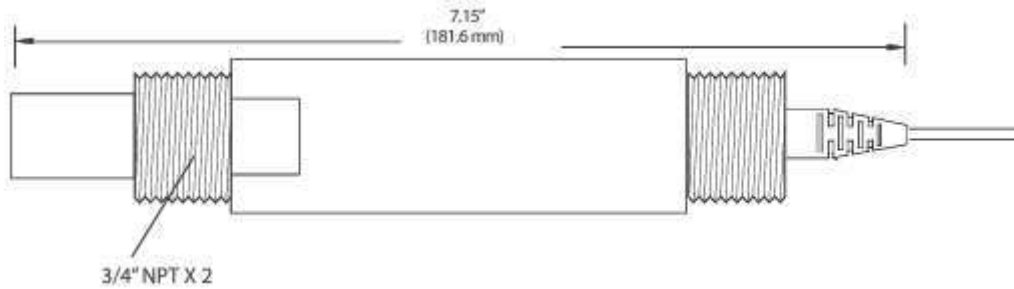

### Features:

- ORP Sensor used in various applications like Chemical processing, Industrial water treatment, Potable water systems, Boiler feedwater, Municipal wastewater plants
- This sensor is designed with double-junction technology and a durable Ryton PPS body
- Double junction reference in sensors helps to prolongs sensor lifetime by preventing contamination of reference electrode
- Due to the flat glass measurement surface required Minimal maintenance
- Easy to install for various online monitoring system

## Agasthya 2021 Series ORP Sensor Model BI1320-S-S

### Dimensions Drawing:

### Technical Specification:

<b>General</b>	Measurement Range : $\pm 2000\text{mV}$
<b>Physical</b>	Sensor Material: Ryton PPS Cable Length: Standard 3m cable, Customize length available Installation: Flow cell / Immersion
<b>Environmental</b>	Temperature: 0 – 100 degC Maximum Pressure: 6 bar
<b>Performance</b>	Process Connection: 3/4" NPT IP Rating: IP68
